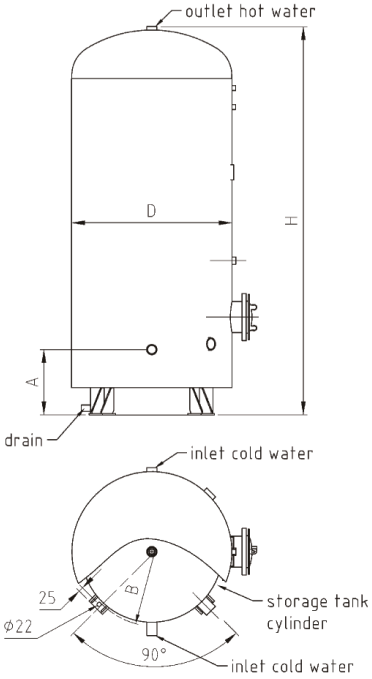
EFFICIENT AND DURABLE

JOWA produces a wide variety of hydrophore and calorifier units for ship and offshore use. Pressure vessels, circulation pumps and other equipment can be provided separately or as complete, ready-mounted unit with control cabinet piping and valves. The tanks are made of stainless steel 316L.

JOWA Calorifiers are among the most efficient and durable on the market, with customers spreading throughout Europe and Asia. The equipment can be adopted to suit different needs of customers. A variety of standard sizes from 100L to 2000L are available. Our products come ready-connected with control cabinet, heating elements and thermostats. Alternative heating sources like steam or hot water and circulation or pressure boosting pumps can also be provided.



Main Features

» Stainless steel design 316L
» Special size on request
» C/W control cabinets
